

Core Library Drillholes

Citation

Unique ID	ANZWA1220000655
Title	Core Library Drillholes
Jurisdiction	Western Australia

Description

Abstract	The Geological Survey of Western Australia, on behalf of the Western Australian Department of Mines, Industry Regulation and Safety, acquires and stores mineral drillcore in its Core Libraries in Carlisle and Kalgoorlie. This mineral drillcore is usually obtained from mineral exploration companies and is selected on the basis of a number of geological criteria and the need to promote the mineral prospectivity of Western Australia. The core libraries in Perth and Kalgoorlie are only capable of storing 2 to 5% of core drilled each year in Western Australia, and once stored is available for public viewing. Information on drillcore is usually sourced from WAMEX reports (company reports) submitted to the Western Australian Department of Mines, Industry Regulation and Safety. The accuracy of such information is not routinely checked. This data is held in GDA 2020 decimal degrees.
