Mineralisation Zones - Designated areas under Section 57 (2aa) Mining Act 1978

Citation

Unique ID	87014F49-97B4-42C9-BF14-C9002BE90AC4
Title	Mineralisation Zones - Designated areas under Section 57 (2aa) Mining Act 1978
Jurisdiction	Western Australia

Description

Abstract	Mineralisation Zones are areas of the state that represent Brown Field areas where only 70 Block exploration licence applications are permitted. Outside of these areas (Green Field) 200 block exploration licence applications are permitted. Mining Act 1978 Section 57 - Grant of Exploration Licence (1) Subject to this Act the Minister may on the application of any person and after receiving a recommendation of the mining registrar or the warden in accordance with section 59, grant to that person a licence to be known as an exploration licence on such terms and conditions as the Minister may determine. (2) The area of land in respect of which an exploration licence may be granted shall be a block or blocks but shall not be more than 70 blocks unless subsection (2aa) applies. (2aa) If the area of land referred to in subsection (2) is in an area of the State designated under section 57A(1) it shall not be more than 200 blocks. Section 57A (5) If — (a) an application for an exploration licence is made in respect of an area of land that is in an area of the State designated under subsection (1) (a designated area); and (b) before the application is determined the designation is varied or cancelled under subsection (2) with the result that the area of land to which the application relates ceases to be in a designated area, then, despite that variation or cancellation, section 57(2aa) applies as if the area of land were in a designated area. This data is held in GDA 2020 decimal degrees.

Publication Date	

Dataset Status

Status	onGoing
Maintenance and Update	daily

Access

Available Format Type(s)	ESRI shapefiles, MapInfo Tab files and Google Earth KMZ files
Available Format Version(s)	ArcGIS 10.3, MapInfo 3
Access Constraints	copyright
Linkage	http://www.dmp.wa.gov.au/datacentre
Application Profile	Data and Software Centre
Function	download

Data Quality

Lineage	This data has been compiled from information collected from DMIRS. Transformed from GDA94 to GDA2020 using GDA94_GDA2020_conformal_and_distortion.gsb transformation via FME.
Positional Accuracy	100%: Defined on GDA94 Graticule (Geographicals : Latitude and Longitude)
Attribute Accuracy	100%
Logical Consistency	Mineralisation Zones are captured from descriptions as supplied by DMIRS
Completeness	The dataset is updated as required and is current at the time of export.
